KOROLIK ARTEM

Student of BSU, Faculty of Mechanics and Mathematics.

Personal projects

Filtrable TodoList

GitHub:
https://github.com/Korolya/FiltrableTodoList

The user can add new tasks, mark their status (completed/uncompleted), see the creation date and delete tasks. There is a filter to display only uncompleted tasks and an option to sort by creation date (new first/old first) or alphabetically.

Technology List: React, React DOM, React Scripts, Loader Utils, TypeScript, Babel Runtime.

Notion Redux

GitHub:
https://github.com/Korolya/NotionRedux

A multi-user note-taking application. Each user can create, delete and edit their notes using the Redux state manager.

Technology List: React, Vite, TailwindCSS, JSON Srever, React DOM, Zod, Redux, Redux Persist, React Redux, React Router DOM.
